Title: Four-party Credit/Debit Payment Protocol

STATUS OF CLAIMS AND SUPPORT FOR CLAIM CHANGES

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

The present application was filed on December 29, 1998 and issued on December 4, 2001 with claims 1-54. In the present reissue application, claims 1-11, 14-23, 25-31, 33-36, 38-44, 46-49, 51, and 53-54 remain unchanged. Claims 12, 13, 24, 32, 37, 45, 50, and 52 have been amended. Claims 55-67 have been added. No new matter has been added.

The amendments made in claims 12, 13, 24, 32, 37, 45, 50, and 52 correct minor grammatical and typographical errors in the claims and help to more clearly set forth the invention. Support in the disclosure for grammatical and typographical changes are unnecessary.

New claims 55-67 have been added. Support for these new claims can be found throughout the disclosure of the patent. Claims 55-58 recite a method of operating a four party payment protocol in accordance with a gateway associated with an issuing bank. The apparatus and computer program product claims for the method recited in claim 55 are recited in new claims 59 and 60, respectively. New claim 61 recites a method of operating a four party payment protocol in accordance with a computer of a merchant. The apparatus and computer program product claims

for the method recited in claim 61 are recited in new claims 62 and 63, respectively. New claim 64 recites a method of providing at least a part of a four party payment service, the part of the service being provided in accordance with a gateway associated with an issuing bank. New claim 65 recites a method of providing at least a part of a four party payment service, the part of the service being provided in accordance with a computer of a merchant. New claim 66 recites a method of operating a four party payment protocol in accordance with a gateway associated with an issuing bank. New claim 67 recites a method of operating a four party payment protocol in accordance with a computer of a merchant.

Support for new claims 55-67 can initially be found in: FIG. 2B illustrating a route of the authorization token in the four-party protocol; FIG. 2C illustrating the use of a consumer's smart card in the four party protocol; and FIG. 4 illustrating a variation in the four-party protocol, wherein the signed authorization token is sent directly to the merchant. The description of FIG. 2B begins on line 14 of column 6 and ends at line 20 of column 7; the description of FIG. 2C is found in column 7, lines 21-54; and the description of FIG. 4 begins on line 18 of column 14 and ends on line 5 of column 15. Additional support for these claims can also be found in the remaining figures and their descriptions, for example, FIG. 8 illustrates a flow diagram of the issuer gateway process in the four-party protocol. The description of FIG. 8 begins on line 53 of column 8 and continues to line 28 of column 9. A more detailed description of the protocol steps follows in columns 10-16.

Respectfully submitted,

A handwritten signature in black ink that reads "William E. Lewis". The signature is fluid and cursive, with the first name "William" being the most prominent part.
